SCA Packaging Germany

OVERVIEW

SCA Packaging is a European leading packaging company of customer-specific packaging with emphasis on state-of-art packaging design and local service close to customer facilities.

With a product portfolio that includes transit packaging, consumer packaging, displays and promotional packaging, customized protective packaging and industrial packaging.

SCA Packaging operates 260 locations across 25 countries.

WATER SYSTEM CHALLENGES

The predominantly present water hardness of 20° dH frequently caused a calcification of the glue and paint spreading rollers prior to the application of the sacrificial anode systems.

SOLUTION

Since 1996, several types of the **ScaleBuster®** have been installed to reliably protect the production water systems in the Pulheim, Germany factory.

RESULTS

Since the installation of the **ScaleBuster®**, the rollers are operating maintenance-free. Calcium deposits affecting operation no longer occur.

ABOUT THE TECHNOLOGY

The patented **ScaleBuster®** technology completely replaces traditional chemical treatment; providing control of scale and corrosion in various water process systems to create an exceptionally clean system. This dramatically reduces energy and water consumption, while reducing or, in certain cases, eliminating toxic water discharge to the environment.
